Dr. Jorge Luis González Tamayo
Director Ejecutivo
INSTITUTO NACIONAL DE CONTRATACIÓN PÚBLICA

CONSOLIDACIÓN DEL SISTEMA, PROYECCIÓN INTERNACIONAL Y DEFINICIÓN DE NUEVOS RETOS

El Instituto Nacional de Contratación Pública -INCOP-, durante el año 2010 encaminó su esfuerzo y su espíritu de trabajo al fortalecimiento y consolidación del sistema, permitiendo que hoy por hoy las compras públicas se desarrollen con criterios de transparencia, inclusión y con miras a la efectiva promoción de la producción nacional.

La actualización de las herramientas transaccionales y el desarrollo de procedimientos que permiten transparentar el control de las contrataciones en situaciones de emergencia han sido parte de las metas alcanzadas durante el 2010. Las estadísticas que demuestran el uso eficiente del presupuesto nacional, mediante la aplicación del Sistema Nacional de Contratación Pública, se mantienen en firme, cada vez con mejores resultados.

El esfuerzo desarrollado se ha visto reflejado en el reconocimiento de nuestra tarea a todo nivel: en octubre anterior la Red Interamericana de Compras Gubernamentales otorgó al Ecuador el PRIMER PREMIO al Liderazgo en Compras Públicas, durante la VI Conferencia de las Américas en Compras Gubernamentales.

De esta manera nuestro país se constituye en uno de los principales referentes en reformas y modernización de la contratación pública, en toda la región. El esfuerzo ¡valió la pena!

Nuevos son los retos que se proyectan hacia el 2011. Retos que nos obligan a superarnos, a fortalecernos aún más, con la misma dedicación y espíritu de equipo.

Centenares de pequeños, medianos y grandes pro-

veedores han encontrado dentro de nuestro sistema oportunidades de crecimiento. El compromiso: mantener y aumentar aún más los niveles de confianza, de transparencia y de eficiencia que consolide a la contratación pública como una política de desarrollo social y económico.

SER transparentes...
SER eficientes...
SER los mejores...
SER parte del cambio, es nuestra tarea!

Dr. Jorge Luis González Tamayo
**DIRECTOR EJECUTIVO
INSTITUTO NACIONAL
DE CONTRATACIÓN PÚBLICA**

SER TRANSPARENTES: NUESTRO OBJETIVO

Al cien por ciento han sido optimizados los doce procedimientos del Sistema Nacional de Contratación Pública -SNCP-, que permiten realizar las compras del Estado a través del Portal: www.compraspublicas.gob.ec.

La herramienta para transparentar las contrataciones en situación de emergencia ha sido habilitada, y permite conocer el detalle de los contratos firmados y la información de los resultados obtenidos.

Además, para cumplir el mandato constitucional de priorizar los productos y servicios nacionales -especialmente los que provienen de las MIPYMES y la economía popular y solidaria, el INCOP implementó márgenes de preferencia en todas las herramientas informáticas con las que cuenta el Sistema Oficial de Contratación Pública del Ecuador COMPRASPUBLICAS. Esta política pública

ha permitido incorporar en calidad de proveedores del Estado a centenares de unidades productivas, a través de procedimientos competitivos y transparentes que permiten dinamizar la economía ecuatoriana.

En esta línea, el Catálogo Electrónico ha sido otro procedimiento de contratación que se ha visto fortalecido a través de la incorporación de 2.360 productos clasificados en diferentes categorías: vehículos, suministros de oficina, de limpieza, equipos de computación y de impresión, así como el de material de apoyo para personas con discapacidad. Esta herramienta logra agilizar los procesos de compra, asegurando a los proveedores de un mercado amplio con todas las garantías que dictamina la Ley.

El Portal www.compraspublicas.gob.ec ha permitido, durante el ejercicio económico 2010, realizar alrededor de

INCOP
Metas en común

refleja en los convenios de cooperación que se ejecutan conjuntamente con el Instituto Ecuatoriano de Seguridad Social, el Servicio de Rentas Internas, la Secretaría de Transparencia, Quito Honesto, gremios que actúan como veedores, entre otras instituciones, a fin de garantizar procesos de compra eficientes y el seguimiento correspondiente.

Con el fin de identificar los avances, fortalezas y debilidades del Sistema Nacional de Contratación Pública - SNCP- y con el apoyo del Banco Interamericano de Desarrollo - BID-, se inició el “Diagnóstico del Sistema Nacional de Contratación Pública del Ecuador”, que a través de la metodología internacional establecida por la Organización para la Cooperación y Desarrollo Económico -OECD-, y con la realización de talleres y procesos de consulta con actores públicos y privados de las compras públicas en el Ecuador, permitirá apuntalar al Sistema Nacional de Contratación Pública en función de estándares de gestión internacionales.

En este proceso, el INCOP ha consolidado las opiniones de entidades y proveedores, pues considera que el fortalecimiento del Sistema Nacional de Contratación Pública es una tarea de toda la nación.

176 mil procesos de contratación, por un monto consolidado que alcanza los 6.461 millones de dólares, y generando una rebaja de 472 millones de dólares aproximadamente, con relación a los presupuestos referenciales destinados a contrataciones previstos por las entidades contratantes.

El principio de transparencia que determina el funcionamiento del Sistema Nacional de Contratación Pública, se ha fortalecido a través del trabajo interinstitucional que se

INDICADORES DEL PORTAL

Eco. Nathalie Cely
**MINISTRA COORDINADORA DE
LA PRODUCCIÓN, EMPLEO Y COMPETITIVIDAD**

EL INCOP: HERRAMIENTA QUE APUNTA LA DEMOCRATIZACIÓN Y REVOLUCIÓN PRODUCTIVA NACIONAL

“Para el Ministerio de Coordinación de la Producción, Empleo y Competitividad, el Instituto Nacional de Contratación Pública, es una herramienta fundamental para el desarrollo productivo nacional.

Prueba de ello es que en el Código de la Producción, Comercio e Inversión se establece la obligatoriedad de realizar compras inclusivas a los actores de la economía popular y solidaria, como una estrategia para dar más oportunidades a los productores más pequeños, de manera de provocar una Revolución Productiva positiva, inclusiva y en potencia”.

Fernando Ushiña
PRODUCTOR DE AUDIOVISUALES

“El ser proveedor ha permitido que mi empresa ahora pueda ofertar al Estado, lo que antes solo lo podían hacer las grandes empresas.

La utilización del Portal de Compras Públicas ha logrado estabilizar los precios en el mercado, eliminando las coimas, comisiones e intermediación.”

“Desde que el Portal de Compras Públicas comenzó a funcionar se convirtió en la puerta de acceso al mercado estatal de jóvenes empresarios que hemos, por varios años, intentado vender nuestros productos. Ahora participamos en igualdad de condiciones y oportunidades.

Gracias al Instituto Nacional de Contratación Pública, he podido vender mis proyectos a las entidades públicas y mi negocio se amplió notablemente.”

La planificación, uno de los postulados del Sistema Nacional de Contratación Pública, ha dado resultados, pues ya no se observa una acumulación de la ejecución presupuestaria en los últimos meses, sino un equilibrio de contrataciones efectuadas a lo largo del año.

IMPULSOR INSTITUCIONAL DEL TRABAJO DIGNO

“La construcción de una sociedad justa, equitativa e incluyente, desde el campo de la política social en el Gobierno de la Revolución Ciudadana, implica generar rupturas y cerrar brechas históricas de desigualdad, de falta de acceso a servicios y de exclusión social y económica. Para ello es necesario impulsar una nueva política enfocada en la promoción de la inclusión socioeconómica y el empoderamiento de los sectores campesinos y populares como actores económicos de la economía popular y solidaria.

La concreción del sistema nacional de inclusión y equidad social motiva el fortalecimiento de la capacidad productiva, el acceso al empleo y el vínculo de la población a un proceso de desarrollo social endógeno sostenible, donde la garantía de acceso a mercados importantes, como el mercado público, por parte de los pequeños productores, y la valoración de la economía popular y solidaria se convierten en un elemento clave de este conjunto de políticas.

Desde esta visión de inclusión económica, el Instituto Nacional de Compras Públicas adquiere un papel rele-

Dra. Jeannette Sánchez
MINISTRA COORDINADORA DE
DESARROLLO SOCIAL

vante, no solo como rector de la compra pública sino, principalmente, como un impulsor institucional del trabajo digno y de oportunidades de vida de los actores de la economía popular y solidaria.

Un ejemplo de ello es la aprobación del reglamento de Ferias Independientes por parte del INCOP, en coordinación con el Ministerio de Coordinación de Desarrollo Social y el MIES”.

Antonio Harnisth
FORMULADOR QUÍMICO INDUSTRIAL

“ La honestidad y seriedad del Portal de Compras Públicas, en el que participo desde hace tres años, me ha permitido competir en igualdad oportunidades, que mi negocio surja y poder crear fuentes de trabajo.

Ser parte del Instituto Nacional de Contratación Pública, es mi carta de presentación hacia el sector privado que, conociendo las normas de calidad, precios y transparencia que exige el INCOP, toma contacto con sus proveedores.”

“ A través del Portal de Compras Públicas, ahora todos podemos trabajar con el Estado.

El Instituto Nacional de Contratación Pública nos ha permitido una libre competencia entre proveedores en igualdad de condiciones y de manera clara y transparente.”

Fernando de la Torre
IMPRESOR COMERCIAL

> CONSOLIDADO POR CANTONES

La contratación pública es un mecanismo fundamental para dinamizar las economías locales a lo largo del país. Más de 5.500 millones de dolares han sido invertidos en procesos de contratación, a través del Portal www.compraspublicas.gob.ec.

PARTICIPACIÓN POR TAMAÑO DE PROVEEDOR POR NÚMERO DE CONTRATACIONES

Cumpliendo con lo establecido en la Constitución, se han establecido márgenes de preferencia en participación de micro, pequeñas y medianas empresas en el Sistema Nacional de Contratación Pública, márgenes que han permitido un notable crecimiento en su producción.

Augusto Barrera Guarderas
ALCALDE DEL DISTRITO METROPOLITANO DE QUITO

“El Municipio de Quito en el año 2010 realizó más de 5.000 procesos de contratación a través de las herramientas del Instituto Nacional de Contratación Pública, superando los 350 millones de dólares en adquisiciones.

EL SISTEMA DE CONTRATACIÓN PÚBLICA ES TRANSPARENTE, EFICIENTE Y ÁGIL

Gracias al sistema, el Distrito ha ahorrado más de 40 millones de dólares en adquisiciones y procesos licitatorios, recursos que ayudan en la construcción del Quito que Queremos; pero sobre todo nos ha permitido establecer una política de contratación pública transparente.

Realizar las contrataciones mediante el portal del INCOP nos permite tender un puente entre el contratante y el proveedor con procedimientos claros, democratizando el acceso al sector público y dejando en el pasado lo discrecional y dirigido. A esto, se añade nuestro programa de presupuesto participativo y permanente rendición de cuentas. Estas acciones son los ejes estratégicos que el Municipio desarrolla en nuestra administración: transparencia y lucha frontal e implacable contra la corrupción”.

“Trabajar con el Estado me ha permitido ampliar mi negocio y darme a conocer a nivel nacional.

A través del Instituto Nacional de Contratación Pública, ahora todos podemos participar en procesos de compra totalmente transparentes y eficientes, sin vinculaciones, ni favoritismos.”

Freddy Barahona
FABRICANTE DE MUEBLES DE OFICINA Y MANTENIMIENTO DE MOBILIARIO

Los resultados obtenidos por el Instituto Nacional de Contratación Pública han permitido al Ecuador integrarse como actor con aportes positivos en los foros regionales y mundiales que tratan sobre la temática de las compras públicas, y superar una brecha de varios años de retraso en cuanto a la implementación de estándares y buenas prácticas universalmente reconocidas. La comunidad internacional mira con interés y ánimo de cooperación el avance de nuestro país.

Durante el año 2010, hemos participado en importantes encuentros a nivel mundial:

- Del 3 al 5 de mayo: Participación en la primera reunión del Grupo de Tareas del CAD-OCDE (Comité de Ayuda para el Desarrollo y Organización para la Cooperación y el Desarrollo Económico). Nairobi – Kenya.
- 1 y 2 de junio: Taller de Compras Sustentables

SER LOS MEJORES: NUESTRO TRABAJO

en América Latina. San José - Costa Rica.

- Del 25 al 30 de agosto: Participación en el IPPC 2010 -International Public Procurement Conference. Seúl – Korea.
- Del 3 al 5 de octubre: Asistencia a la segunda reunión de evaluación para llegar a la suscripción del Acuerdo Comercial Multipartes. Bruselas – Bélgica.
- Del 13 al 15 de octubre: Participación como miembros de la Red Interamericana de Compras Gubernamentales – RICG- en la VI Conferencia Anual de Compras Gubernamentales en las Américas. Lima – Perú.
- Del 21 al 24 de noviembre: Participación en el Taller Regional Avanzado de la OMC sobre Contratación Pública para los países de América Latina. Buenos Aires - Argentina.

Dr. Jorge Luis González Tamayo,
Lima - Perú

En octubre del año anterior, en el marco de la VI Conferencia Anual de Compras Gubernamentales en las Américas, el Director Ejecutivo del INCOP recibió el **PRIMER PREMIO DE LIDERAZGO EN COMPRAS PÚBLICAS**, en

PRIMER PREMIO DE LIDERAZGO EN COMPRAS PÚBLICAS

reconocimiento al esfuerzo sostenido desarrollado por esta institución hacia la reforma y modernización de las compras públicas en nuestro país.

Fue un jurado integrado por representantes de organizaciones como el Banco Interamericano de Desarrollo -BID-, la Organización de los Estados Americanos -OEA-, el Centro Internacional de Investigaciones para el Desarrollo -IDRC-, la Universidad Nacional de San Martín de Argentina -UNSAM-, y la Agencia Canadiense para el Desarrollo Internacional -CIDA- el encargado de reconocer al Ecuador, a través del INCOP, como el más alto referente en liderazgo para el cambio del Sistema de Contratación Pública en la región.

De esta manera, la evaluación internacional permite apuntalar los resultados positivos de un proceso iniciado hace algo más de dos años, y encamina la gestión del INCOP hacia objetivos cada vez más ambiciosos, en función del interés nacional.

SI TODOS SABEMOS, TODOS CUMPLIMOS

Capacitar y asesorar a entidades contratantes y proveedores en cuanto al funcionamiento y aplicación del Sistema Nacional de Contratación Pública, más allá de una obligación legal del INCOP, constituye uno de nuestros objetivos fundamentales: estamos conscientes de que la dinámica de las compras públicas depende en gran medida de la correcta aplicación de las normas y del conocimiento de cómo funcionan las herramientas del sistema, por parte de los servidores públicos; por otro lado, el conocimiento de estos temas es un legítimo derecho de todo ciudadano, en la medida que solo de esa manera podrá convertirse en un proveedor eficiente del Estado.

Por estas razones y desde su creación, el INCOP desarrolló programas de capacitación a nivel nacional, en varios formatos y con consideraciones pedagógicas que se han fortalecido en función de la experiencia: podemos afirmar que ofrecemos al Ecuador el programa más completo de capacitación en el ámbito de la contratación pública. Hasta el momento se han preparado 18 manuales de usuario para entidades contratantes, y 10 para

proveedores, todos ellos disponibles a través del Portal www.compraspublicas.gob.ec.

En esta línea, y para cumplir este objetivo, hemos cooperado con otras instituciones públicas -de carácter académico y técnico-, con cámaras productivas, organismos gremiales y colegios profesionales, entre otros, a fin de crear cursos especializados que satisfagan la demanda del servidor público y del proveedor a nivel nacional.

Hay más novedades: en el año 2010, iniciamos el proyecto INCOP CAPACITA, una plataforma de autoaprendizaje disponible a través del Sistema Oficial de Contratación Pública del Ecuador COMPRASPUBLICAS, cuyos resultados son satisfactorios, y cuyo desarrollo culminará en el 2011.

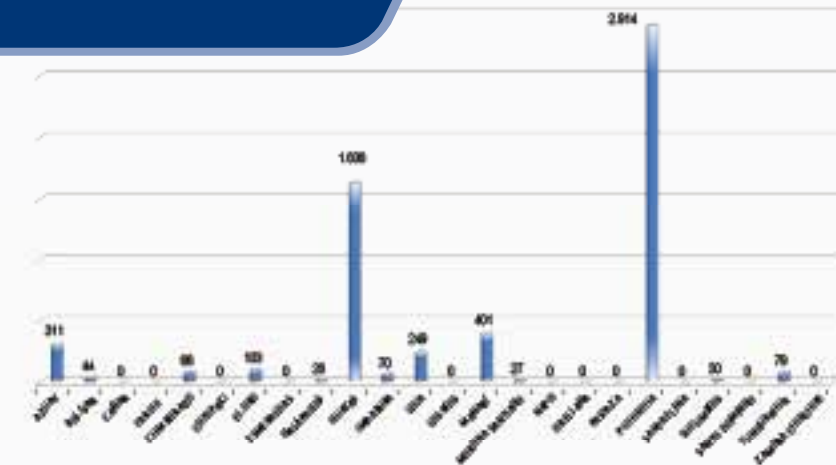

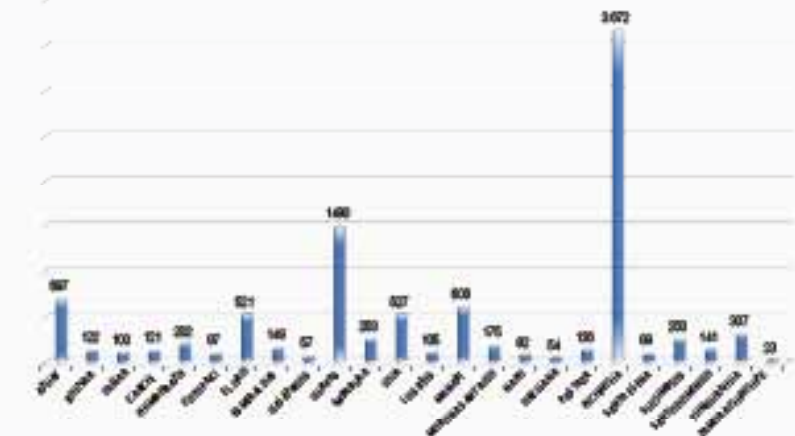

En total, más de 16.500 ciudadanos y ciudadanas han sido capacitados en las 24 provincias del Ecuador, durante el 2010, y alrededor de 30 mil durante los dos años de gestión del INCOP.

EL DEBER SER,
DE LA CONTRATACION
PÚBLICA

EL INCOP, en su calidad de órgano rector del Sistema Nacional de Contratación Pública, tiene la atribución legal de facilitar los mecanismos a través de los cuales se podrá realizar veeduría ciudadana a los procesos de contratación pública, con la obligación de monitorear su efectivo cumplimiento.

Por tal razón, cuenta con un grupo de profesionales que diariamente vigila, supervisa y monitorea, de oficio o a petición de parte, los procedimientos de contratación que son parte del Sistema Nacional de Contratación Pública, para que en su desarrollo se observe la normativa vigente, a fin de evitar conductas que atenten contra la igualdad de oportunidades, el trato justo y la transparencia de gestión de las entidades contratantes.

Para el efecto, existe un trabajo coordinado con la

Contraloría General del Estado y la Secretaría Nacional de Transparencia de Gestión, entre otras instituciones del ámbito público.

Por otro lado, la Ley Orgánica del Sistema Nacional de Contratación Pública considera la importancia de la participación ciudadana, a través de la promoción de espacios de veeduría mediante los cuales la sociedad civil aporta con observaciones, denuncias y sugerencias que permiten fortalecer el monitoreo técnico de procesos y transacciones realizados a través del Portal www.compraspublicas.gob.ec. En este sentido, cámaras productivas, colegios profesionales y demás organizaciones sociales participan de este proceso veedor, sustentado en los principios de excelencia, técnica, neutralidad política y ausencia de intereses particulares. Hasta el momento se han suscrito 26 Convenios de Veeduría Ciudadana.

AnnualReport
2010 |

Dr. Jorge Luis González Tamayo
EXECUTIVE DIRECTOR
NATIONAL INSTITUTE FOR PUBLIC CONTRACTING

SYSTEM CONSOLIDATION, INTERNATIONAL PROJECTION AND DEFINITION OF NEW CHALLENGES.

During 2010, the National Institute for Public Contracting (INCOP, acronym in Spanish) focused its efforts and working spirit to strengthen and consolidate the system, allowing nowadays carrying out public procurement with criteria such as transparency, inclusion and foreseeing the effective promotion of the national production.

The update of the transactional tool and the development of procedures that allow to transparent the control of the contracts in emergency situations, have been part of the goals reached on 2010. The statistics show that the efficient use of the national budget, through the application of the National System for Public Contracting, remains firm, showing better results each time.

The effort that has been carried out has been reflected in the recognition of our work at all levels: in October 2010, the Inter-American Network for Governmental Procurement granted Ecuador the FIRST PRIZE to Leadership on Public Procurement, during the VI Conference of the Americas on Governmental Procurement. By this way, our country has become one of the main references on reforms and modernization of public contracting in the whole region. The effort was worthwhile!

New are the challenges that are projected for 2011; those challenges oblige us to exceed, to strengthen ourselves even more, with the same dedication and team spirit.

Hundreds of small, medium sized and large suppliers

have found opportunities for growth in our system. The commitment is to maintain and increment the trust, transparency and efficiency levels even more, to consolidate the public contracting as a policy for social and economic development.

To BE transparent...
To BE efficient
To BE the best...
To BE part of the change, that is our job!

Dr. Jorge Luis González Tamayo
EXECUTIVE DIRECTOR
NATIONAL INSTITUTE FOR PUBLIC CONTRACTING

OUR OBJECTIVE: TO BE TRANSPARENT

In hundred percent, the twelve procedures of the National System for Public Contracting have been optimized; that allow making the government purchases through the Portal www.compraspublicas.gob.ec.

The tool to make the contracting in emergency situations more transparent has been implemented and it allows knowing the details of the contracts that have been signed and the information of the results that have been obtained.

Besides, in order to fulfill the constitutional mandate to prioritize the national products and services, especially those produced by medium sized and small enterprises and popular and solidarity economy, the INCOP implemented preference ranges in all the computerized tools

that are part of the Official System for Public Contracting of Ecuador (COMPRASPUBLICAS). This policy has allowed incorporating hundreds of production units as government suppliers, through competitive and transparent procedures that allow energizing the Ecuadorian economy.

On the same area, the Electronic Catalogue is another contracting procedure that has been strengthened through the inclusion of 2.360 products classified in different categories such as: vehicles, office supplies, cleaning supplies, computer equipments and printers, as well as the supporting materials for handicapped people. This tool helps to make purchase processes faster, ensuring the providers of a wider market with all the guarantees established in the law.

INCOP
Common goals

plemented with the Ecuadorian Social Security Institute, the Internal Revenue Service, the Transparency Secretariat and Honest Quito, among other institutions, in order to ensure efficient procurement processes and make the proper follow up on them.

In order to identify the advances, strengths and weaknesses of the National System for Public Contracting, and with the support of the Interamerican Development Bank, the "Diagnostic of the National System for Public Contracting of Ecuador" started; which, through the international methodology established by the Organization for the Cooperation and Economic Development (OECD, acronym in Spanish) and with the implementation of workshops and consultation processes with public and private actors of public procurement in Ecuador, will allow to reinforce the National System for Public Contracting based on the international management standards. In this process, the INCOP has consolidated the opinions of entities and providers, because it considers that the strengthening of the National System for Public Contracting is a duty of the whole nation.

During the economic exercise 2010, the portal www.compraspublicas.gob.ec has allowed to perform 176 thousand contracting processes, for the consolidated amount of 6.461 million dollars, generating pre-supuestary reduction of around 472 million dollars, compared to the reference budgets planned by the contracting entities.

The principle of transparency that rules the operation of the National System for Public Contracting, has been strengthened through the inter-institutional work which is reflected in the cooperation agreements that are im-

Eco. Nathalie Cely
COORDINATOR MINISTER
OF PRODUCTION, LABOR AND COMPETITIVENESS

THE INCOP: TOOL THAT CARRIES FORWARD THE DEMOCRATIZATION AND THE NATIONAL PRODUCTIVE REVOLUTION

“For the Coordination Ministry of Production, Labor and Competitiveness, the National Institute for Public Contracting is a basic tool for the national production development.

A proof of this is that the Code of Production, Commerce and Investment includes the obligation to perform inclusive purchases to the actors of popular and solidarity economy, as a strategy to provide more opportunities to the smaller producers, in order to cause a positive, inclusive and potential productive revolution, which is inclusive and potential”.

Fernando Ushiña
PRODUCER OF AUDIO VISUALS

“Being a supplier has allowed my business to be able to offer to the State. In the past this was possible only for large companies.

The use of the Public Purchases portal has allowed stabilizing the prices in the market; it has eliminated the tips, commissions and intermediation.”

“Since the public purchases portal started to operate, it became a door to enter to the state market for young entrepreneurs as myself, who have attempted for many years to sale our products.

Now we participate with equitable conditions and opportunities. Thanks to the National Institute of Public Contracting, I have been able to sell my projects to public entities and my business has notably grown.”

Planning, one of the assumptions of the National System for Public Contracting has produced results, as now there is not an accumulation of budget execution in the last months of the year, but a balance of contracts performed along the whole year.

INSTITUTIONAL DRIVER OF WORTHY WORK

The construction of a fair, equitable and including society, from the field of social politics in the Government of the Citizens Revolution, implies to generate breaks and close historical gaps of inequality, of lack of access to services and of social and economic exclusion. For this purpose, it is necessary to promote a new policy focused on the promotion of socio-economic inclusion and the empowerment of the peasant and popular areas, as economic actors of popular and solidarity economy.

The creation of the inclusion and social equality national system motivates the strengthening of the production capacity, the access to employment and a population link to a social endogenous and sustainable development process, where the guarantee of access important markets, such as the public market, for the small producers and the valuation of popular and solidarity economy, become key elements in this set of policies.

Dra. Jeannette Sánchez
COORDINATOR MINISTER OF SOCIAL DEVELOPMENT

From this vision of economic inclusion, the National Institute for Public Procurement has a relevant role, not only as the ruler of public procurement, but mainly, as the institutional promoter of work with dignity and living opportunities of the actors of popular and solidarity economy. An example of this is the approval of the INCOP of the Independent Fairs, in coordination with the Coordination Ministry for Social Development and the Ministry of Economic and Social Inclusion.

Antonio Harnisth
CHEMICAL INDUSTRY FORMULATOR

“The honesty and seriousness of the Public Purchasing Portal, in which I have participated for three years, has allowed me to compete with equal opportunities, my business has grown and I have been able to create new work positions.”

To be part of the National Institute for Public Contracting is my presentation letter to the private sector, which knows the quality regulations, the prices and the transparency required by the INCOP and contacts the suppliers.”

“Through the Public Purchasing Portal, now we can all work with the State.”

The National Institute for Public Contracting has allowed free competence among the suppliers in equitable conditions, clearly and transparently.”

Fernando de la Torre
COMMERCIAL PRINTER

CONSOLIDATED BY CANTONS

Public contracting is a basic mechanism to energize local economies along the country. More than 5.500 million dollars have been invested in contracting processes, through the portal called www.compraspublicas.gob.ec, at the national level.

The Unique Register of Suppliers has allowed the participation of almost 71 thousand people in the contracting processes that are carried out by the public entities, with the opportunity to improve their economy.

* The values obtained are subject to variances as some suppliers were disabled in further periods

> PARTICIPATION PER THE SIZE OF THE SUPPLIERS
PER NUMBER OF CONTRACTS

Fulfilling what is stated in the Constitution, preference ranges have been established in the participation of micro, small and medium sized enterprises in the National System for Public Contracting. Those ranges have allowed an important growth in the production.

Augusto Barrera Guarderas
ALCALDE DEL DISTRITO METROPOLITANO DE QUITO

In 2010 the Municipality of Quito performed more than 5.000 contracting processes through the tools of the National Institute for Public Contracting, with more than 350 million dollars in purchases.

PUBLIC PROCUREMENT
SYSTEM IS TRANSPARENT,
EFFICIENT AND AGILE

Thanks to the system, the District has saved more that 40 million dollars in purchases and bidding processes; that resources help in the construction of the city that we want, but especially, it has allowed us to establish a policy for transparent public contracting.

To perform all the contracts through the portal of the INCOP allows us to create a bridge between the contractor and the supplier with clear processes, democratizing the access to the public sector and leaving discretionary and focused processes in the past. This is added to our program for participative budget and continuous accountability. These actions are the strategic axes that the Municipality develops in our administration: transparency and a frontal and relentless fight against corruption.

“To work with the state has allowed me to expand my business and get known at a national level.

Through the National Institute for Public Contracting, now we can all participate in purchasing processes that are totally transparent and efficient, without bondings or favoritisms.”

Freddy Barahona
OFFICE FURNITURE MANUFACTURER AND FURNITURE
MAINTENANCE PROVIDER

The results obtained by the National Institute of Public Contracting has allowed Ecuador to enter for the first time in the regional and worldwide forums related to the topic of public procurement and overcome the gap of several years of delay on the implementation of standards and good practices that are universally recognized. The international community sees the advance of our country with interest and willingness to cooperate.

During 2010 we have participated in important worldwide events such as:

- May 3 -5: Participation on the first meeting of the Task Force of the Aid Committee for Development and Organization for Cooperation and Economic Development (CAD-OCDE, acronym in Spanish). Nairobi – Kenya.

OUR WORK: TO BE THE BEST

- June 1 - 2: Sustainable Procurement Workshop in Latin America, San José - Costa Rica.
- August 25 - 30: Participation on the IPPC 2010 -International Public Procurement Conference. Seoul – Korea.
- October 3 - 5: Attendance to the second evaluation meeting to sign the Multilateral Commercial Agreement. Brussels – Belgium.
- VI Annual Conference for Government Procurement in the Americas. Lima – Peru.
- November 21 - 24: Participation in the Advanced Regional Workshop of the World Commerce Organization about Public Contracting for the Latin American countries. Buenos Aires - Argentina.

Dr. Jorge Luis González Tamayo,
Receives award
Lima - Perú

In October, 2010, at the VI Annual Conference for Government Procurement in the Americas, the Executive Director of the INCOP received the FIRST PRIZE TO LEADERSHIP ON PUBLIC PROCUREMENT, as recognition to the sustained

FIRST PRIZE TO LEADERSHIP ON PUBLIC PROCUREMENT

effort carried out by this institution towards the reform and modernization of the public procurement in our country.

The Jury was formed by the representatives of several organizations such as the Interamerican Development Bank, the Organization of American Countries, the International Center for Development Research; the National University of San Martin in Argentina, and the Canadian Agency for International Development, which was in charge of granting this prize to Ecuador through the INCOP, as the highest reference in leadership for the change of the Public Contracting System in the region.

By this way, the international evaluation allows supporting the positive results of a process that started about two years ago, and guides the work of the INCOP towards more ambitious objectives, based on the national interest.

Train and provide advice to the contracting entities and providers about the operation and application of the National System for Public Contracting, besides being a legal obligation of the INCOP, is also one of our basic objectives; we are aware that the dynamics of public procurement depends of the correct application of the rules and public workers must know how to use the tools of the system. On the other hand, all the citizens have the right to get to know about these topics, because only this way they will be able to become efficient suppliers of the government.

For the above mentioned reasons and since it was created, the INCOP developed training programs at the national level, in several formats with teaching considerations that have been strengthened based on the experience; we can now affirm that we offer Ecuador the most complete training program in public contracting areas. 18 user manuals have been prepared to date for the contracting entities and 10 manuals for suppliers. All

IF WE ALL KNOW, WE ALL PERFORM

of them are available through the portal called www.compraspublicas.gob.ec.

In order to reach this objective, we have cooperated with other public institutions of academic and technical nature, with production chambers, unions and professional associations, among others, in order to create specialized courses to cover the demand of the public worker and the provider at a national level.

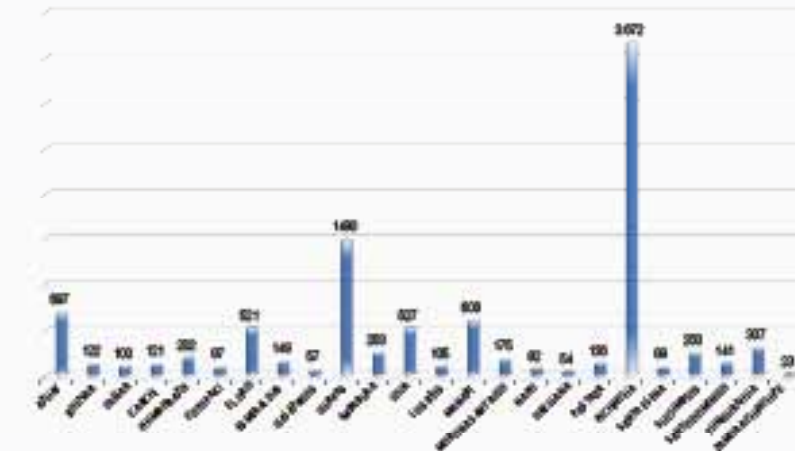

There is more news: On 2010, we started the project called INCOP TRAINS (INCOP CAPACITA), a self-learning platform available through the portal called www.incop-capacita.gob.ec, with good results. The development of this site will be finished in 2011

During 2010, a total number of more than 16.500 citizens have been trained in the 24 provinces of Ecuador and about 30 thousand people in the two years that the INCOP has been operating.

THE MUST BE OF PUBLIC CONTRACTING.

As a ruling entity of the National System for Public Contracting, the INCOP has the legal attribution to facilitate the mechanisms to perform citizen surveillance to the public contracting processes, with the obligation to monitor the effective fulfillment.

For this reason, the entity has a group of professionals who look after, supervise and monitor every day, as part of their duties or as requested, the contracting procedures that are part of the National System for Public Contracting, in order to ensure the fulfillment of the current regulations in the processes, and avoid any behaviors that go against equal opportunities, fair treatment and transparency in the work of the contracting entities.

For this purpose, there is a coordinated work with the

General Controller's Office of the Government and the National Secretarial for Operation Transparency, among other public institutions.

On the other hand, the Organic Law of the National System for Public Contracting considers the importance of citizens' participation, through the promotion of surveillance spaces, this way the society is able to provide observations, accusations and suggestions to strengthen the technical monitoring of the processes and transactions carried out through the portal www.compraspublicas.gob.ec. In this sense, the production chambers, professional associations and other social organizations participate in the surveillance process, based on principles such as excellence, technique, political neutrality and lack of particular interests. 26 Citizen Surveillance Agreements have been signed so far.

> NUMBER OF PROCESSES OBSERVED AND PROCESSES DECLARED AS DESERTED BASED ON THE OBSERVATIONS MADE BY THE INCOP

MONTH	PROCESSES OBSERVED	PROCESSES DESERTED
JANUARY	88	5
FEBRUARY	117	17
